BÜRSTNER

#wohnfühlen

QUALITY...

Choosing the right Campervan requires extensive information. Bürstner is not only characterised by good quality, well thought-out technology, and attractive design, but also offers many other advantages...

QUALITY IN SECURITY

Bürstner takes this issue very seriously and equips all motorhomes – if technically possible in the living area – with 3-point seatbelts. You can also expect ABS (anti-lock braking system) as standard. In all models driver airbag comes as standard.

THOUGHTFUL FLOOR PLANS

Bürstner designs floor plans according to the needs of the users. If you want to travel with your friends or family, you will particularly appreciate our countless storage options, our dedication to the flexible and functional details and, above all, the homely atmosphere synonymous with Bürstner.

EXCEPTIONALLY GOOD PRICE-PERFORMANCE RATIO

What Bürstner already offers as standard – supplemented by the extremely attractive equipment packages – is second to none. Many of our customers use the opportunity to equip their vehicle with these packages (depending on the model) and thus secure their perfect campervan.

WARRANTY *

Bürstner stands for #wohnfühlen – even after the purchase. That is why we offer you an all-round carefree package. In addition to the legal guarantee, you will receive both 2-years manufacturers guarantee as well as a 10-year guarantee against water ingress. Please note all guarantee conditions, which include prescribed and paid care and maintenance intervals. Your Bürstner dealer is available to answer your questions and will be happy to carry out the work for you. *According to the Guarantee conditions.

FOOTNOTES

¹ The actual height can change as a result of special equipment, e.g. sleeping roof, satellite, etc.

² 3rd berth with the option "Dinette transformable to berth (across)" / / 4th and 5th berths with the option "Pop-top roof"

³ 3rd and 4th berths with the option "Pop-top roof"

⁴ If a collision or an impact cannot be avoided, the post-collision brake is activated automatically. It will stop your car immediately and prevent a possible secondary collision with another obstacle or vehicle.

⁵ In conjunction with pop-top roof

⁶ Without pop-top roof

⁷ Child seat depending on the type

⁸ Only in connection with a 90L refrigerator

⁹ When ordering the automatic transmission in conjunction with aluminum rims, the Maxi aluminum rims are installed on the light chassis.

¹⁰ 160 HP available until May 31, 2022

¹¹ Vehicle height changes if optional pop-top roof is added (approx. 275 cm)

¹² Load capacity to 3,500 kg chassis

¹³ Not in conjunction with a pop-up roof

¹⁴ Required for longer operation of the Truma Combi diesel heater at altitudes from 1,500 to 2,750 meters.

¹⁵ Night Vision Package and Fiat Round View Package cannot be combined with each other.

Please find more details concerning weight under "Important references"

IMPORTANT INSTRUCTIONS

Any change in the factory condition of your vehicle can impair driving and traffic safety

- Observe all relevant regulations for a safe operation of your vehicle
 - Make sure that you have the correct drivers license to be able to drive the vehicle
 - Please note the “technically permissible total weight” of your vehicle must not be exceeded
 - Please note that if you change (load / unload) the technically permissible total weight, the trailer load can also change!
 - Observe the maximum permissible axle loads and ensure that they are dependent on the axle load distribution
 - Installing roof structures and antennas will change the vehicle height
 - Depending on the vehicle type, not all antennas/structures can be placed on the roof. Some accessories can be mounted.
 - The technical data in the catalogue includes the series status at the time of printing. Despite a thorough review of the content we cannot rule out printing errors. During the respective model year, we reserve the right to change equipment and improve the products we make.
 - Deviations in structure and colour from those shown in the brochure are reserved insofar due to the nature of the materials used. They are normally commercially available.
 - The same applies to technical changes to the vehicle, in context of the vehicle quality overall remains the same or is improved and the intended use is not affected.
 - Please inform yourself about the current product and series condition before signing a contract at a Bürstner authorised trading partner.
 - All accessory prices are for factory installation, in frame of a new vehicle.
- ** Explanations of the weight information are in the technical data.
- The capacity of the freshwater tank i.S.d. App, Part A, Zff. 2.6 Fn (h) VO (EU) 1230/2012 depends on the vehicle model. The overflow installed on the freshwater tank (if available) is limited to 5, 20 or 50 litres (= driving condition)
 - The mass of the vehicle in running order can change +/- 5% from the stated values (see Appendix 2, no. 2.2. b) VO (EU)

1230/2012).

- The technically permissible total mass acc. Art. 2, no. 7 VO (EU) 1230/2012 is defined as: The one specified by the manufacturer maximum mass of the vehicle when loaded.
- The payload in terms of the technical data is defined as: Technically permissible total mass minus mass in ready to drive status.
- Please note: The alternatively possible, surcharged engines and all other chassis optional such as Automatic transmission and air conditioning cause a change in weight. The additional weight of the individual chassis and engine variants as well as chassis options is given in the individual optional equipment lists for the chassis-specific options.
- Dimensions in running order according to the VO (EU) No. 1230/2012 including basic equipment (75 kg for driver, filled fuel tank, filled water tank in driving position with 20 litres, gas in an aluminium bottle to 100% and electrical connection cable) in the basic version. The mass in running order (and the possible payload or number of people) changes with different motorisation or equipment variant and through the addition of special equipment. Deviations within the scope of the factory tolerances are possible and permissible
- The specified payload option is dependant on the empty weight and is reduced by the weight of the attached optional equipment (the values result from the price list or can be obtained from your dealer). It requires an appropriate load distribution. The maximum load consists of conventional loads: 75kg per passenger, personal equipment (10kg luggage per passenger and driver plus 10kg per meter of vehicle length) and residual load, which can be used for additional special equipment or additional luggage.
- The specified number of people is reduced if the mass increases while the vehicle is ready to drive. The increase occurs when the engine variant deviates from the basic variant, when installing special equipment variant. Using the weight information in the price list or talking to your Bürstner dealer, make sure that the technically permissible total weight is not exceeded and that there is sufficient loading capacity for people and consumer goods.

UK - All prices are quoted in Sterling and include VAT @ 20%. Price details were current at the time of going to press. The publication of this price list shall render all previous prices invalid. Valid for deliveries after 08 November 2021. Prices may vary depending on your delivery date. The prices include statutory value added tax at the current rate of 20% and are subject to change in case of amendments to the tax rate or on introduction of tariffs. Subject to mistakes, printing errors and changes. All the information is based on UK specification.
